Anotes Torgan: B-cells; Vector: porB7; Site_1: XhoI; Site_2: ECCRI; cDNA made by Oligo-dT priming.
Directionally cloned into BernYXhoI sites using the following 5' adaptor: GGRAGAG(G). Size-selected >500bp for average insert size 1.8kb. Library constructed by Ling then in the laboratory of Gerald M. Rubin (University of California, Berkeley) using 2.8P-cDNA synthesis kit (Stratagene) and Superscript II RT (Life Technologies).
                                                                                                                                                                                                                                                                                                                                                                                                                                                              BG686876 889 bp mRNA linear EST 01-MAY-2001

a modified polylinker; Site_1: Not I; Site_2: Eco RI; Equal amounts of plasmid DNA from three normalized libraries (fetal lung NHL19W, testis NHT, and B-cell NOT_CGAP_GCB1) were mixed, and ss circles were made in vitro. Following HAP purification, this DNA was used as tracer in a subtractive hybridization reaction. The driver was PCR-amplified cDNAs from pools of 5,000 clones made from the same 3 libraries. The pools consisted of I.M.A.G.E. clones 297480-302087, 682632-687239, 726408-728711, and 729096-731399. Subtraction by Bento soarses and M. Fatima Bonaldo. "

/robe="Organ: pooled; Vector: pT7T3D-Pac (Pharmacia) with a modified polylinker; Site_l: Not I; Site_2: Eco RI; Equal amounts of plasmid DNA from three normalized libraries (fetal lung NbHL19W, testis NHT, and B-cell NCI_CGAP_GCB1) were mixed, and ss circles were made in vitro. Following HAP purification, this DNA was used as tracer in a subtractive hybridization reaction. The driver was PCR-amplified cDNAs from pools of 5,000 clones made from the same 3 libraries. The pools consisted of I.M.A.G.E. clones 297480-302087, 682632-687239, 726408-728111, and 729096-731399; Subtraction by Bento

Anote—"Organ: pooled; Vector: pT7T3D-Pac (Pharmacia) with modified polylinker; Site_1: NOt I: Site_2: ECO RI; Equal amounts of plasmid DNA from three normalized libraries (fetal lung NDHI19W, testis NHT, and B-cell NCI CGAP GCB1) were mixed, and ss circles were made in vitro. Following HAP purification, this DNA was used as tracer in a subtractive hybridization reaction. The driver was PCR-amplified cDNAs from pools of 5,000 clones made IT. Thom the same 3 libraries. The pools consisted of I.M.A.G.E. clones 297480-302087, 682632-687239,

Following HAP purification, this DNA was used as tracer in a subtractive hybridization reaction. The driver was PCR-amplified CONAs from pools of 5,000 clones made from the same 3 libraries. The pools consisted of 1.M.A.G.E. clones 297480-302087, 682632-687239, 726408-728711, and 729096-731399. Subtraction by Bento Soares and M. Fatima Bonaldo. " a 90 c 79 g 117 t.

NCI_CGAP_Sub3 library is a subtracted library derived from
the NCI_CGAP_Sub1 library, which is a subtracted library
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Email: cgapbs-remail.nlb.gov
The sequence contained an oligo-dT track that was present in the oligonucleoutide that was used to prime the synthesis of first strand cDNA and therefore this may represent a bonafide poly A tail. cDNA Library Preparation: M.B. Soares Lab Clone distribution information can be found through the I.M.A.G.E. Consortium/LiNL at:
www-bio.lln.gov/bbrp/image/image.html The following repetitive elements were found in this cDNA sequence: 1-21,
                                                                                                                                                                                                                                                                                                                                                                                                                   GTTTTTCTATGACTTTTAGGTAGGATGAGGAGGAAGGTAGATCCTAAAAAGCATGGTGA 1024

The Sequence contained an oligo-dT track that was present in the
oligonucleotide that was used to prime the synthesis of first
strand cDNA and therefore this may represent a bonafide poly A
tail. cDNA Library Preparation: M.B. Soares Lab Clone distribution:

Anote—"Organ pooled; Vector: pT7T3D-Pac (Pharmacia) with a modified polylinker; Site_1: Not I: Site_2: Ero RI; Equal amounts of plasmid DNA from three normalized libraries (fetal lung NbHL19W, testis NHT, and B-cell NCI_CGAP_GCBI) were mixed, and ss circles were made in vitro. Following HAP purification, this DNA was used as tracer in a subtractive hybridization reaction. The driver was PCR-amplified CDNAs from pools of 5,000 clones made from the same 3 libraries. The pools consisted of I:M.A.G.E. clones 297480-302087, 682632-687239, 726408-728711, and 729096-731399. Subtraction by Bento Soares and M. Fatima Bonaldo. "
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          1140 bp mRNA linear EST 21-DEC-2000 mRNA sequence.

BF663150 The ST 21-DEC-2000 mRNA sequence.

MARNING: There is evidence that suggests that the 384-well parent
plate of this clone contains both human and mouse derived clones.
Thus, the origin of this clone is uncertain. This caution should bept in mind should you use this clone.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         AAO74342 Linear EST 23-DEC-199
